CRESCENDO STATEMENT AMPLIFIER STAND

Unleash the Potential of Your Power Amplifier

The **AG Lifter Crescendo** Amplifier Stand is our ultimate design based on the proven **Crescendo** Audio Isolation Rack. The frame of the **AG Lifter Crescendo** Amplifier Stand allows adjustment for tuning. This adjustment can pay dividends to the overall end performance.

The **AG Lifter** frame is constructed from proprietary designed aluminium extrusion (ISO 9001) and available in silver or black satin durable finishes. Matched billet aluminium caps are permanently pressed into the vertical pillars. The elegant and detailed design of an **AG Lifter Amp Stand** comprises of 85 components. Custom orders are welcome for any dimension of power amplifier or mono power amplifiers.

AG Lifter Dulcet 19 and **Dulcet 20** Isolation Feet are standard on the **Crescendo** Amplifier Stand to mitigate resonance. This provides a dual layer of isolation under the stand and under the equipment shelf.

A CNC machined 20mm heavy weight acrylic captive shelf supports the amplifier.

The majestic sound is natural and has a wide-open soundstage, while retaining weight and clarity through the whole frequency range.

SPECIFICATIONS

- Proprietary designed aluminium extrusion
- Billet aluminium caps
- Choices of Silver or Black Satin finishes
- Etched graduations to accurately calibrate frame adjustments
- Dual **Dulcet** isolation feet technology
- Upgradable to **Dulcet HPC Brass** Isolation technology
- Adjustable isolation and frame design
- Heavy Weight Captive CNC machined 20mm acrylic shelf
- **REF 70** bearing technology
- Lower noise floor
- Majestic Sound
- Sounds natural and life like
