## CRESCENDO MODULAR ISOLATION RACK

“The **AG Lifter** philosophy is that your Isolation Rack is the foundation of any Hi-Fi System. It is the essential first building block to measure your Hi-Fi Equipment.”

What our philosophy means is implementing the **Crescendo Isolation Rack** will reduce harmonics which cause distortion and harsh edges to your music. Providing an open depth of field in the sound stage with an extended deep bass response. Instruments and vocals will reveal more textures and dynamics compared to standard racking systems or furniture. The elegant and detailed design of an Crescendo 4 Shelf rack comprises of 287 components and over 11.4 metres of alloy.

The **Crescendo Isolation Modules** incorporates technology from the development of all products by **AG Lifter**. Implementing the **Crescendo Isolation Rack** will result in a feeling you’ve upgraded all your audio components. The racking design is modular, allowing the user to layer and then wire-up audio components making it easier to assemble. This modular concept allows the user to stack or place modules next to one another to suit all rooms.

The **Crescendo Isolation Rack** encompasses several layers of Isolation starting from the ground using the **Dulcet 20 (Large) Isolation Feet**, each module is then **decoupled** utilising SS bearings sitting in a billet CNC machined cap pressed into vertical custom extrusions. Each acrylic shelf is then **isolated** using the **Dulcet 19 (Small) Isolation Feet**. The **Dulcet 19 Isolation Feet** are adjustable (width and depth) for fine tuning.

The frame is a custom designed aluminium extrusion (ISO 9001) with aluminium billet caps, that dampen the extrusion. The custom extrusion is designed by **AG Lifter**, and carries a patent covered by our New Zealand Aluminium Supplier. The end extrusion is born from extensive research and development, using different profiles. A proprietary fastener used to further apply tension to the extrusion results in a frame dampened, but live enough to provide exciting sound. Frame finishes are available in Black and Silver, including complimentary capping finishes.

Dimensions are:

**4 Shelf Crescendo Isolation Rack:** 1020mm (H) x 600mm (W) x 500mm (D)

Rack allows 240mm max for equipment as standard, custom height is available as a special order.
