

AGLifter

Amplifier Stand

The **AG Lifter Amplifier Stand** is custom designed for the weight and dimensions of most heavy weight Power Amplifiers and Power Conditioners/Regenerators. The **AG Lifter Amplifier Stand** will improve the performance of your Power Amp/Conditioner/Regenerator by lowering the noise floor creating a blacker background. This will result in increased openness, detail and bass response; all the same advantages of the signal and source level components on the **AG Lifter Crescendo 4 Shelf Rack**.

The **AG Lifter Amplifier Stand** is constructed of a custom extrusion with billet aluminium caps for dampening. The shelf is 20mm thick acrylic. Nitrile shelf supports are utilised on this product. Frame finishes are in Black and Silver as standard, however other finishes are available as a custom finish, please contact your dealer for details.

The **AG Lifter Amplifier Stand** is supported from the ground by our **AG Lifter Dulcet 20 Isolation feet**.

The **AG Lifter Amplifier Stand** Dimensions:
500mm (width) x 500mm (length) x140mm (height)

*The **AG Lifter Amplifier Stand** comes with a Lifetime Warranty on the frame only.*
