CRESCENDO STATEMENT AMPLIFIER STAND

Unleash the Potential of Your Power Amplifier

The **AG Lifter Crescendo** Amplifier Stand is our ultimate design based on the proven **Crescendo** Audio Isolation Rack. The frame of the **AG Lifter Crescendo** Amplifier Stand allows the adjustment for tuning. This adjustment can pay dividends to the overall end performance. Please ask your dealer for adjustment recommendations.

The **AG Lifter** frame is constructed from proprietary designed aluminium extrusion (ISO 9001) and anodised in silver or black satin durable finishes. Match anodised billet aluminium caps are permanently pressed into the vertical pillars. This quality of manufacture has allowed **AG Lifter** to offer a limited frame warranty. Custom orders are welcome for any dimension of power amplifier or mono power amplifiers.

AG Lifter Dulcet 19 and **Dulcet 20** Isolation Feet are standard on the **Crescendo** Amplifier Stand to mitigate resonance. This provides a dual layer of isolation under the stand and under the equipment shelf.

An attractive CNC machined 20mm heavy weight acrylic top shelf supports the amplifier, the finished size of the shelf may vary for custom builds.

The overall sound is natural and has a wide open soundstage, while retaining weight and clarity through the whole frequency range.

SPECIFICATIONS

- Proprietary designed anodised aluminium extrusion
- Billet anodised aluminium caps
- Choices of Silver or Black Satin Anodised finishes
- Etched graduations to make equal frame adjustments or return adjustments easy
- Factory tool supplied for easy setup
- Dual **Dulcet** isolation feet technology
- Upgradable to **Dulcet HPC Brass** Isolation technology
- Adjustable isolation and frame design
- Heavy Weight CNC machined 20mm acrylic shelf
- **REF 70** bearing technology
- Lower noise floor
- Open and spacious musical presentation
- Sounds natural and life like
