EUPHONIOUS ISOLATION RACK

The **AG Lifter Euphonious Rack** provides a detailed and life like sound stage. It will outperform any standard or custom cabinetry and racking systems. This may be one of your best investments you make in Audio. The **AG Lifter Euphonious Isolation Rack**, only surpassed by the **AG Lifter Crescendo and Apollo Isolation Rack** is an industry breakthrough offering a truly isolated upgradable audio racking system as an affordable product in the **AG Lifter** Range.

AG Lifter have started by constructing an aluminium frame made of our proprietary ISO 9001 extrusion, middle section shelves are adjustable in height to suit most electronic components. This quality of manufacture has allowed **AG Lifter** to offer a limited frame warranty. Shelves are supported on nitrile feet as standard. The complete rack is then sitting upon **AG Lifter Dulcet 20 Isolation feet**.

Shelving is manufactured from high quality acrylic 15mm and 20mm top. The shelves are CNC cut providing a highly accurate and seamless edge finish, with captive design (cannot slide out of the frame).

Three and Four shelf options are available on order from your local dealer. Black and Silver anodized surface finishes are also provided on order.

An upgrade path is possible for rack users by providing an M6 sliding nut design to support the shelving as in the premium **Crescendo** model of **AG Lifter** product. This allows the removal and replacement of the **Euphonious** standard rubber shelf supports and the fitting any of the isolation feet from the **AG Lifter** range, all Dulcet 19 model feet fit the M6 nut arrangement. The feet are moveable from left to right so tuning is possible to suit your electronic equipment.

Euphonious 3 Shelf Rack Dimensions:
600mm (width) x **500mm** (depth) x **705mm** (total overall height)
At even spacing **220mm** in between shelves (note centre shelf is adjustable)

Euphonious 4 Shelf Rack Dimensions:
600mm (width) x **500mm** (depth) x **930mm** (total overall height)
At Even Spacing **198mm** in between shelves (note 2nd and 3rd shelf height is adjustable)
